## **DETAILED ACTION**

### ***Status of the application***

1. Receipt of applicant's remarks and arguments filed on 10 Aug 2009 is acknowledged.
2. However, the arguments for the 103(a) rejections are not found persuasive and as such, the previous rejection has been maintained for the reasons of record made on made on 11 March 2009.

### ***Response to Arguments***

3. Applicant's arguments filed on 10 Aug 2009 have been fully considered but they are not persuasive.

The examiner acknowledges applicant's argument that instant invention has an external heatable and separately regulatable heat exchanger, which allows for prevention of pressure and temperature fluctuation in the system; whereas Link et al teach a heat exchanger which is not externally heatable and separately regulatable, and therefore, pressure and temperature fluctuations in the system according to Link et al can not be prevented.

The examiner contends, however, that the cited secondary reference teach the external heat exchangers for an analogous process. **Dummer et al** teach a method for the production of vinyl chloride by thermal cracking of 1,2-dichloroethane by using a quench column and a heat exchanger, with the temperature ranging from 480° to 540°C, down to 150° to 250°C. The heat exchanger are externally located, see heat exchangers 14, 16 and 21 in the Figure. Therefore, a skilled person would be obvious

to a skilled person in the art, to modify Link et al process using the external heat exchangers taught by Link et al and to arrive at instantly claimed process with a reasonable expectation of success.

With regard to applicants' declaration, the examiner asserts that these modifications are within the purview of a skilled person in the art. **Dummer et al** showed the teachings of external heat exchangers in an analogous process. Therefore, applicants comparative data and their unexpected results are, in fact, are expected with their modifications.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 4-10 and 12-15 are again rejected under 35 U.S.C. 103(a) as being unpatentable over **Link et al** (US 4,798,914) in view of **Dummer et al** (US 4,822,932) for the reasons of record as set forth in the office action on 11 March 2009.
7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136 (a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no even, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
